DryWall TOOLBOX

Business Operation Roles Blueprint

A simple guide to who leads each stage of Drywall Toolbox's day-to-day operations

Sales orders • Repair services • Customer support • Returns & warranty • Inventory & supplier workflow

PREPARED FOR

Elliott Miller and Ben Conklin

September 2026

How Drywall Toolbox Operates

Elliott — Workflow & Customer Operations **Ben** — In-House & Repair Operations Shared

Drywall Toolbox is starting as a two-person operation. Elliott and Ben both help wherever needed, but each workflow has a clear primary lead so work keeps moving smoothly.

Intake, coordination & customer communication
PRIMARY: ELLIOTT

→

Physical, in-house execution
PRIMARY: BEN

→

Shipping, tracking & completion
PRIMARY: ELLIOTT

Most work moves through this pattern, while both partners assist each other where needed.

Elliott

Business Operations & Customer Workflow Lead

- Leads day-to-day workflow coordination
- Manages customer orders and support cases
- Organizes shipments, labels, and tracking
- Maintains inventory visibility and reporting
- Keeps work moving from intake to completion

Ben

In-House Repair, Inventory & Physical Operations Lead

- Leads repair work and in-house execution
- Makes replenishment decisions
- Handles vendor communication and receiving
- Makes return, warranty, and pricing decisions
- Supports physical order fulfillment and inspections

Shared Execution Principle

Primary responsibility shows who leads a stage to completion. It does not prevent either partner from helping. Because Drywall Toolbox is starting with a two-person team, Elliott and Ben will support each other wherever workload requires.

Inventory & Supplier Operations

Elliott — Workflow & Customer Operations **Ben** — In-House & Repair Operations Shared

This workflow keeps inventory visible, helps Ben decide what needs to be reordered, and makes sure incoming supplier shipments are received and reconciled correctly.

Inventory tracking & visibility	Low-stock awareness & reporting	Replenishment decision	Supplier order / purchase order	Vendor communication	Product receiving	Inventory reconciliation	Ongoing monitoring
PRIMARY: ELLIOTT	PRIMARY: ELLIOTT	PRIMARY: BEN	PRIMARY: SHARED	PRIMARY: BEN	PRIMARY: BEN	PRIMARY: ELLIOTT	PRIMARY: ELLIOTT

How Elliott Supports This Workflow

- Builds and maintains the inventory tracking workflow
- Monitors quantities and trends
- Keeps Ben informed of current inventory needs
- Reconciles received inventory into the tracking system

How Ben Leads This Workflow

- Decides what should be reordered
- Helps place supplier orders
- Leads vendor communication
- Receives and verifies incoming product shipments

Shared ordering activity

Elliott and Ben both handle actual supplier orders. Elliott maintains visibility and tracking. Ben determines what needs to be replenished and leads the vendor-side receiving workflow.

Product Sales & Fulfillment

Elliott — Workflow & Customer Operations **Ben** — In-House & Repair Operations Shared

This workflow shows how customer orders move from intake to shipment. Elliott keeps the order moving and manages the shipping workflow, while both partners help fulfill orders and Ben supports the physical side of fulfillment.

1. **Customer order received** — PRIMARY: ELLIOTT
2. **Order review & coordination** — PRIMARY: ELLIOTT
3. **Pick products** — PRIMARY: SHARED
4. **Pack order** — PRIMARY: SHARED
5. **Create label & organize shipment** — PRIMARY: ELLIOTT
6. **Physical shipment prep** — PRIMARY: BEN
7. **Ship / carrier handoff** — PRIMARY: SHARED
8. **Tracking & customer follow-up** — PRIMARY: ELLIOTT
9. **Order exception resolution** — PRIMARY: ELLIOTT

Elliott leads

- Order management and coordination
- Shipping labels and shipment organization
- Tracking, follow-up, and customer communication
- Routine order-issue resolution

Ben leads

- Physical shipment preparation
- Hands-on support during fulfillment
- Product checks when physical verification is needed

Shared work

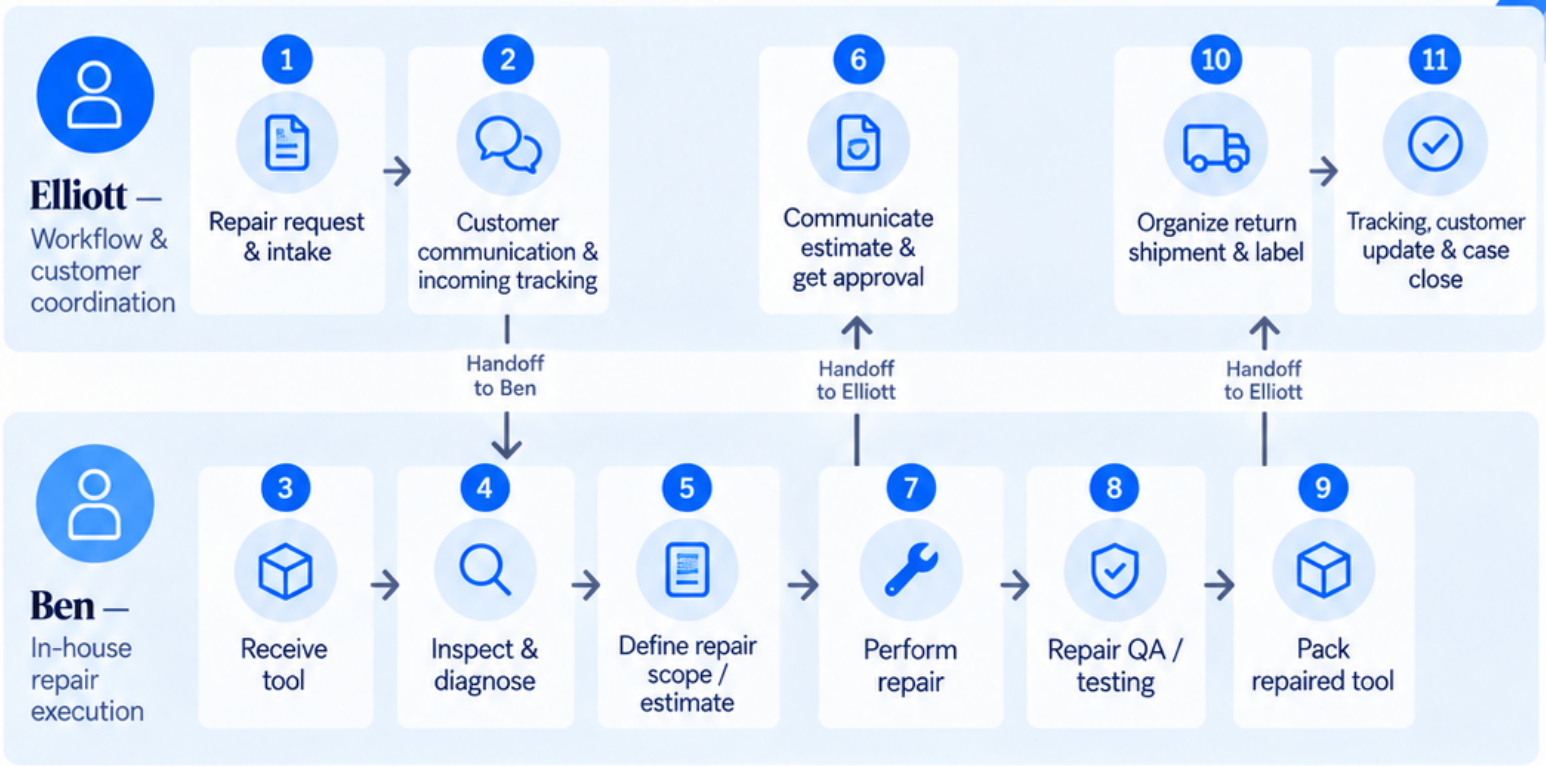

- Picking
- Packing
- Shipping help during busy periods
- General order-fulfillment assistance

Simple rule

Elliott keeps the order workflow moving from intake to completion. Ben supports the physical side of fulfillment, and both partners step in where needed.

Repair Service Workflow

Repair work moves back and forth between customer coordination and in-house tool repair. Elliott manages the case, communication, tracking, and return shipment workflow. Ben handles the technical repair work inside the shop.

Elliott's repair-service role

- Manages intake and case flow
- Communicates with the customer
- Tracks incoming and outgoing repair shipments
- Gets estimate approval and closes the case

Ben's repair-service role

- Receives the tool
- Diagnoses the issue
- Performs the repair work
- Tests the repaired tool before return

Repair handoff pattern

Most repair jobs follow a simple path: Elliott opens and guides the case, Ben repairs the tool, and Elliott completes the return-shipment and customer side of the workflow.

Customer Support, Returns & Warranty

Elliott — Workflow & Customer Operations **Ben** — In-House & Repair Operations Shared

Customer cases usually begin with Elliott, who manages communication and workflow coordination. Ben steps in when the issue requires a business decision, physical inspection, or technical judgment.

1. New support or return case — PRIMARY: ELLIOTT
2. Triage & customer communication — PRIMARY: ELLIOTT
3. Order or shipping issue resolution — PRIMARY: ELLIOTT
4. Physical inspection if needed — PRIMARY: BEN
5. Return / refund decision — PRIMARY: BEN
6. Warranty determination — PRIMARY: BEN
7. Pricing / discount exception — PRIMARY: BEN
8. Return-case processing & customer follow-up — PRIMARY: ELLIOTT
9. Replacement fulfillment — PRIMARY: SHARED
10. Case closure — PRIMARY: ELLIOTT

Decision responsibilities led by Ben

- Return and refund decisions
- Warranty determinations
- Pricing or discount exceptions
- Product or tool judgments requiring physical review

Workflow responsibilities led by Elliott

- Customer communication and support follow-up
- Case organization and tracking
- Shipment coordination and tracking
- Processing the chosen resolution through completion

At-a-glance role summary

Elliott
Business Operations & Customer Workflow Lead

- Orders, customer support,
- shipping coordination,
- inventory visibility,
- operational follow-through.

Ben
In-House Repair, Inventory & Physical Operations Lead

- Repairs, replenishment
- decisions, vendor
- communication, receiving,
- warranty and refund decisions.

Shared

- Supplier orders, picking, packing, shipping help, inventory counts, and workload overflow support.

Primary responsibility means who leads the stage to completion — both partners still help each other as needed.
