WHAT SIZE DO I NEED?

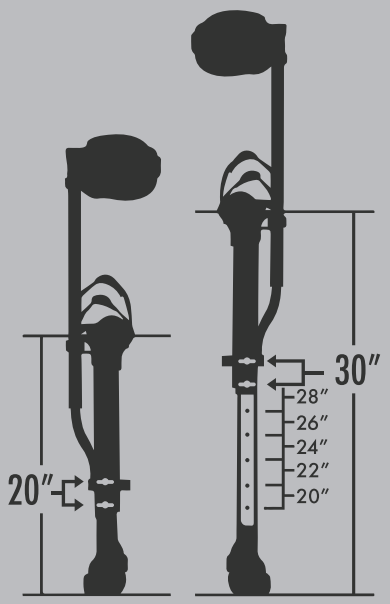

1. Find your height without stilts.
2. To calculate your height on stilts, add your height to the height of the stilts:

   (i.e. 5′3″ + 26″ = 7′ 5″)
3. Estimate your maximum reach on each of our size ranges.

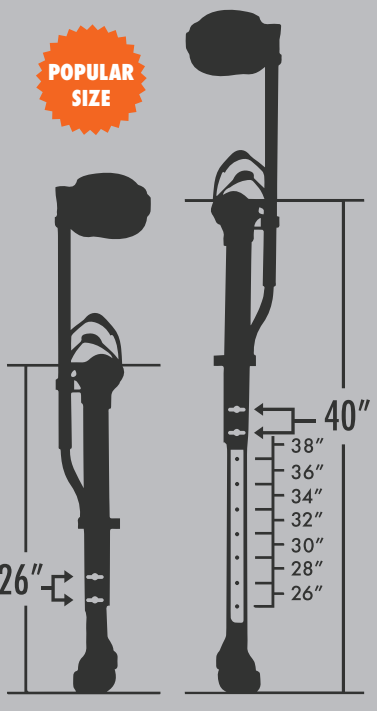

How high do you want to reach?

We offer different sizes of adjustable height stilts. Our most popular size is 26″-40″, as they will lift your feet off the ground 26″ (at minimum) and 40″ (at maximum), and are adjustable in 2″ increments in between the minimum and maximum height. A quick review of the table below shows how our 26″-40″ stilts allow almost every user to reach 10′ or higher, which makes them very popular among contractors working on residential and commercial ceilings. For example, the average male (5′ 9″) who is primarily working on 8 ft or 9 ft ceilings, may opt for a smaller size, like 20″-30″ and an even taller person (say, someone 6′ 1″) will be able to reach the same height on a 16″-24″. Keep in mind, maximum reach may be different than your working height. For example, if you want your hands at eye level, you can simply add the height of the stilts to your height and subtract a few inches. The stilts illustrations (see right) are shown as single-sided stilts, though these same sizes apply to our double-sided stilts. Give us a call if you have questions.

Add 1″ for 21″-31″ S1X/S2X

WITHOUT STILTS		MAXIMUM REACH WITH STILTS		
YOUR HEIGHT	YOUR MAX. REACH	16″-24″	20″-30″	26″-40″
5′ 1″	6′ 9″	8′ 1″ – 8′ 8″	8′ 5″ – 9′ 2″	8′ 11″ – 10′
5′ 2″	6′ 11″	8′ 2″ – 8′ 9″	8′ 6″ – 9′ 3″	9′ – 10′ 1″
5′ 3″	7′	8′ 3″ – 9′	8′ 7″ – 9′ 6″	9′ 1″ – 10′ 4″
5′ 4″	7′ 1″	8′ 4″ – 9′ 1″	8′ 8″ – 9′ 7″	9′ 2″ – 10′ 5″
5′ 5″	7′ 3″	8′ 6″ – 9′ 3″	8′ 10″ – 9′ 8″	9′ 3″ – 10′ 6″
5′ 6″	7′ 4″	8′ 7″ – 9′ 4″	8′ 11″ – 9′ 10″	9′ 4″ – 10′ 8″

SINGLE-SIDED
DRYWALL STILTS

SurPro

MODERN INNOVATION

The original Drywall Stilts, modernized. The superiority of these traditional drywall stilts are best illustrated in the field, after miles of comfort and years of dependability. These commercial grade stilts are the go-to for contractors looking for a safer, more comfortable, and efficient way to work tall. From top to bottom, you'll enjoy exclusive features like our flexible wraparound leg bands that won't cut into your calves, and our key and lock "no-twist" side poles that won't waste your time with constant adjustments. Our double wing bolts keep our stilts tight and secure at any height and add an extra layer of safety. Take a big step above industry standard with the S1.

DOUBLE-SIDED
DRYWALL STILTS

NEXT-LEVEL STABILITY

The best balance and stability in the drywall stilts category. The ground breaking differentiator of these stilts are the dual side poles, which immediately increase the balance and stability of the stilts and user. The legs bands provide equal support to your entire calf and improve comfort. New users and seasoned pros that can overcome change should experience less fatigue and reduced stress on the body. This equates to better performance and increased safety. This sturdy-built design is well-loved among contractors seeking more comfort. The addition of the inside leg pole adds a learning curve for experienced single-sided stilts users not use to it being there.

THE LIGHTEST & MOST DAMPING SINGLE-SIDED STILTS.

Reduce weight and vibrations with magnesium.

SurPro HIGH PERFORMANCE STILTS

SurPro S1

MAGNESIUM STILTS

Traditional style with modern advancements in safety, comfort, and performance. With magnesium being 33% lighter than aluminum, the stilt bodies on the S1 Magnesium Stilts reduce weight without sacrificing safety. Step above industry standard, save weight, and get the most popular single-sided stilts in the industry.

- Magnesium frames are lighter and have 10X damping versus aluminum to reduce vibrations
- Adjustable height in two inch increments
- Auto-locking buckles and premium cotton straps
- Adjustable dual-action spring for precise resistance
- Enhanced safety features throughout
- Wider foot plates for better footing and balance

S1X PERFORMANCE DRIVEN

We've known Brian Kitchin since before he founded the leading YouTube Channel for drywall enthusiasts - Drywall Nation. He's a big fan of our Stilts, and we value his opinions and input on our stilt designs. Before we launched the X model stilts, we sent a pair of single sided S1X Stilts and a pair of double sided S2X Stilts for his feedback. Scan the QR code or visit the YouTube URL to see real world performance.

DOUBLE-SIDED DRYWALL STILTS

REDUCE FATIGUE

Better stability equates to less fatigue. Whereas the "1" in S1 represents a traditional single side pole design, the "2" in S2 represents our revolutionary double sided pole design. Contractors that make the switch to double-sided stilts will feel the benefits after prolonged use. The increased stability and balance of the symetrical design reduces fatigue and promotes better performance. Both sides of the user's leg are equally supported by side poles and a 360 degree wrap around leg band. Whether the user is a new stilt walker or a seasoned pro, the added stability, reduction in fatigue, and increased comfort will all lead to better overall performance and worker safety. Even though these stilts are a bit heavier out of the box, most users tell us that they actually feel lighter than traditional stilts when working on them. Choose from our popular S2 models or the latest generation S2X models (as pictured) with the ***New Rocker Leg Bands and Flexion Foot System*** to achieve the most natural walking feel.

- REDUCE FATIGUE & INCREASE PERFORMANCE
- MAXIMIZE COMFORT & ELEVATE THE WORKING EXPERIENCE
- NEXT-LEVEL STABILITY & SAFETY
